UNDERSTANDING THIS REPORT

This report is intended to allow students to be more accountable for their attitude to learning and to provide parents/caregivers with regular feedback. It reinforces the key competencies of managing self, participating & contributing and relating to others from the New Zealand Curriculum, and the Riccarton Way Values:

- Students commit to their learning journey (manawanui)
- Students are honest in their approach to learning (ngākaupono)
- Students respect the process of learning (manaakitanga)
- Students continually strive to be "better than before" (kairangi)

The criteria used in determining the level of the attitude to learning are:

4 Highly Engaged

(this is our goal for Riccarton High School students)

The student is consistently positive and motivated. They show an outstanding attitude, take responsibility for their learning, participate actively, and respond well to feedback.

3 Engaged

The student is generally positive and willing to learn. They complete tasks, participate in class, and usually stay focussed with occasional reminders.

2 Developing

The student is inconsistent in their attitude to learning. Their engagement and effort vary, and they require regular encouragement or support to stay focussed and complete their work.

1 Limited Engagement

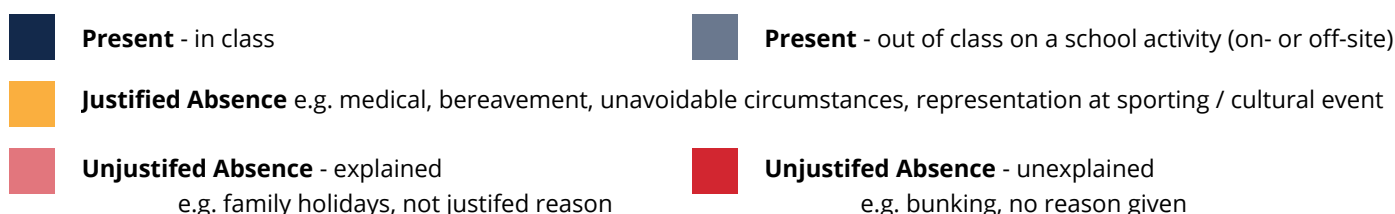

The student is frequently disengaged from learning. They show little effort or motivation, are often off task, and require significant support to focus.

ATTENDANCE

For each **subject**, the number of times that the student was present in class and the number of times the class was held are shown, along with the overall attendance percentage for the year. If students are absent from class for any reason, including school activities, this percentage will be reduced, reflecting the amount of in class learning missed.

The **overall absence statistics** below and at the top of the front page show the total number of periods absent from school. School activities which result in the student being out of class are excluded from these figures.

The graph below gives a breakdown of Aryanne's attendance details for the year to date. The Ministry of Education considers that for a school student to be "Attending Regularly", their rate should be at least 90% present.
